## ANNUAL REPORT OF THE SANITARY INSPECTOR FOR THE YEAR 1948.

To the Chairman and Members of the  
Bowdon Urban District Council.

Gentlemen,

I beg to present my Annual Report on the Sanitary Circumstances of the Area.

### Water Supply.

The whole of the district is supplied from the Manchester Corporation mains. The supply in all cases is direct to the house.

During the year the supply has been constant and satisfactory in quality and quantity.

Frequent Bacteriological and Chemical examinations are made of the water before going into supply. The results of the chemical analyses were satisfactory and in the case of 99 Bacteriological tests 90 were certified free from coliform bacteria.

As a precaution against plumbo-solvent action, the water is treated with hydrated lime. This reduces the lead content of water after standing 18 hours in contact with lead service pipes to about 0.2 parts per million.

### Sewerage & Drainage.

Small amounts of defective drains and sewers have been found and remedied during the year.

New lengths of sewer were provided on the Council Housing Site.

The sewer in Stanhope Road was extended by 500 ft. to accommodate new dwellings. Owing to the shallow depth this length was encased in 6" concrete.

With the exception of 7 outlying cottages the whole of the district is on the water carriage system.

### Smoke Abatement.

No complaints have been received and no action has been necessary during the year.

### Eradication of Bed Bugs and other Insect Pests.

No cases of bug infestation were discovered during the year.

21 wasps nests were destroyed .

The Departments help was asked for in the elimination of other pests when D.D.T., Gammexane and other remedies were supplied.

### Infectious Diseases.

Very few cases of Notifiable Infectious Diseases occurred during the year. In most cases they were treated at home.

Factories.

No action has been necessary.

Inspection of Food.

(a) Milk Supply.

There are eight producers in the area. These premises were constantly inspected.

(b) No adulteration has been reported and no action has been necessary.

(c) Inspections of Meat & other Foods.

Frequent visits of inspection to food shops are made.

There is only one butchers shop in the area, the meat being obtained from Altrincham.

The following foodstuffs were surrendered and certified as unfit for human consumption:-

Pinhead Oatmeal	170 lbs.
Tongue	6 lbs.

Canned Foods.

Apricots.	6 tins.	Marmalade.	2 tins.
Gooseberries.	4 "	Sweet Milk.	5 "
Evaporated Milk.	13 "	Salmon.	8 "
Soup.	11 "	Luncheon Meat.	3 "
Peas.	6 "	Minced Beef.	3 "
Meat & Cereal.	1 "	Pilchards.	3 "

Slaughter of Animals Act 1933.

There are no slaughter houses or knackers yards in the area.

One licence to slaughter is in force.

Rodent Control.

Under the Rats & Mice (Destruction) Act 1919 the County Council are responsible for the enforcement of the Act.

The County Council have delegated their powers to this Council and the Sanitary Inspector acts as the Rodent Officer.

One of the Council's workmen has attended courses of instruction in Rodent Control and his services are utilised in this work as and when required.

The Ministry of Food recommended methods are used.

Sewer tests are taken at six-monthly intervals and the results have been very gratifying.

The Council's refuse tip, sewage farm and Towns Yard are baited monthly as routine matter and at other times if found necessary.

-3-

Rodent Control (Continued)

No serious infestations have been found or reported. The usual cases reported are of occasional rats infesting hen runs, these have usually been found in the outlying districts and are speedily dealt with.

I am, gentlemen,

Your obedient servant,

A. E. SHIMMINGS,

Sanitary Inspector.
